

ABSTRACT OF THE DISCLOSURE

5 A light emitting diode (LED) 360 degree pod warning signal light is
disclosed. The 306 degree pod includes a controller for generating a plurality of
observable light signals. The controller may regulate the illumination of LED's to a
desired pattern, sequence, and/or combination of simultaneous and/or individual light
signals. The 360 degree pod includes a support frame which is adapted to receivingly
hold an LED light source assembly through the use of affixation clips. A plurality of light
10 directors are positioned proximate to the LED Light sources which in conjunction with
the cover function to direct and focus the light emitted from the LED's in a desired
direction or area.
